

The Decentralized TRC20 Cryptocurrency Token based on Tron smart contract for Blockchain Education, Research and Consultancy

WHITEPAPER

Version 1.2.0

Created on: December 27th 2020

Last revised: June 8th 2021

Abstract

In this modern day and near future, blockchain-based technology and its applications have advanced the innovation in many fields, such as the electronic money transfers, personal banking, online payments, Internet of Things, distributed storage and many others. While most of the cryptocurrencies have a dystopian future in vision, in which the end-user is 100% disconnected from the finance industry, some new players have started to fill in this gap (Ripple, Populous, etc.) by becoming a bridge between financial institutions or companies and the cryptocurrency adopters. In the same vision, RCI aims to be the cryptocurrency token for the finance sector, enabling the Token holders to gain from its inherent cryptographical model (Pool / Stake) and from the range of financial investment made available through the RCI ecosystem.

SECTION 1

RCI INTRODUCTION

RCI (RUMAH CRYPTO INDONESIA)

RCI was initiated by Group of Crypto Enthusiast lead by Pieter Louis, with initial RCI members of 35 person. Now we had more than 100 loyal members forming a solid community.

RCI – Rumah Crypto Indonesia Details

RCI Total Supply	: 5000 Tokens
RCI Issuer	: Pieter Louis
RCI Release Format	: TRC 20
RCI Contract Address	: TL58C1nVAL8yxtvPX5vadVPdkidYXtdrXc
RCI Reputation	: Neutral

RCI – Who We are and What We do

Rumah Crypto Indonesia Project formed by local Indonesia Crypto Community. Led by Pieter Louis, a crypto enthusiast and initial member of 35 people. RCI community now growing to a size of 1000 members forming a strong and solid community that never runs away.

RCI is building a constructive community and ecosystem in adopting blockchain technology to solve problems for various real life use cases and application.

We help people to learn and understand about blockchain technology, cryptocurrency, token and new development in this space through many various workshops and researches.

SECTION 2

RCI Project and Application

RCI - Project

FOR THE BETTER DEVELOPMENT OF RCI

Our development team will launch several projects to support the development of RCI's future value. We hopes to become the top rated TRC20 Token to be used by enterprises and individuals.

RCI - Application

REAL WORLD REAL MARKET REAL USE

RCI provides a complete Crypto Token Launch services, starting from the idea to conception, creation and launch of a new token. Following the latest trend and development in Blockchain industry, RCI is in the good position to usher a big wave in the emergence of Community Token, Custom Token, Social Token and the likes.

In every activity mentioned above, which are Education, Research, Consultancy and Advisory, it will only use and involve RCI Token. This way, we can actively contribute to the acceleration of blockchain literacy, inclusion and application.

RCI Token is already listed and tradable in JustSwap. This year of 2021, RCI already entered Bololex Market and now preparing to be listed in several crypto exchanges, such as Bololex, PoloniDex, Hotbit and Indodax. To support this plan, we will run several activities and campaign involving RCI token, where every participating RCI Token holder would reap financial benefit.

With a total supply of only 5,000 (five thousand) RCI Token, and supported by a rapid growth of community, ecosystem and upcoming Token Launch projects, RCI can easily enhance users' confidence and increasing the use and value of RCI Token.

SECTION 3

RCI Roadmap
